"A geometric approach to simultaneous approximation"

„A geometric approach to simultaneous approximation“

Abstract:

After an introduction to the fundamentals of simultaneous approximation and a brief overview of classical results, I will introduce a method introduced by W. Schmidt and myself using the Geometry of Numbers that has led to considerable progress in this area within the last ten years. I will put emphasis on the main ideas of the theory without going into technical details and present a selection of new results that illustrate the advantages of this geometric approach.

Zeit: Mittwoch 30. November 2016
15.45 Uhr Kaffeejause,
16.15 Uhr Vortrag,
vinum cum pane im Anschluss

Ort: Fakultät für Mathematik,
Oskar-Morgenstern-Platz 1,
Sky Lounge

Christian Krattenthaler
