Vienna PDE Afternoon

30.03.2022 from 14:00 to 16:00

From 14:00 to 14:45:

Mohammad Reza Pakzad (University of Pittsburgh, USA)

Non-convex variational problems emerging in nonlinear elasticity

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=648>

From 15:00 to 15:30:

Stefanos Georgiadis (TU Wien and KAUST, Saudi Arabia)

Multicomponent Compressible Flows with Heat Conduction and Mass Diffusion

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=649>

From 15:30 to 16:00:

Michael Innerberger (TU Wien)

Optimal goal-oriented adaptive FEM

Abstract: <https://www.univie.ac.at/sfb65/#!/public/events/details/?type=1&id=650>

The seminars take place on Zoom. The Zoom link is sent per email through the DK/SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://www.univie.ac.at/sfb65/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
