Partial Differential Systems

## Vienna PDE Afternoon

18.01.2023 from 14:00 to 15:30

University of Vienna, Faculty of Mathematics,  
Oskar-Morgenstern-Platz, 1, Vienna

HS 2, ground floor

(this event takes also place online)

From 14:00 to 14:45:

**Raphael Winter** (University of Vienna)

*Landau damping for a point charge in interaction with a screened Vlasov–Poisson plasma*

Abstract: <https://sfb65.univie.ac.at/#!/public/events/details/?type=1&id=700>

---

From 15:00 to 15:30:

**Leon Happ** (TU Wien; Medical University of Vienna)

*An inverse problem to the radiative transfer equation and instability estimates in the diffusion regime*

Abstract: <https://sfb65.univie.ac.at/#!/public/events/details/?type=1&id=699>

---

The seminars take place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to [matteo.tommasini@univie.ac.at](mailto:matteo.tommasini@univie.ac.at) (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
