Partial Differential Systems

Austrian
Science Fund

Vienna PDE Afternoon

13.03.2024 from 14:00 to 15:30

University of Vienna, Faculty of Mathematics, Oskar-Morgenstern-Platz 1

HS 2 (ground floor) and Zoom

From 14:00 to 14:45:

Oliver Hahn (University of Vienna)

Decoding our cosmic origins from galaxy surveys

Abstract: <https://sfb65.univie.ac.at/s/nr/>

From 15:00 to 15:30:

Daniele De Gennaro (Université Paris-Dauphine, France)

Explicit diffusion/redistancing scheme for the mean curvature flow

Abstract: <https://sfb65.univie.ac.at/s/ns/>

The seminars take place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at <https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/>

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
