Vienna PDE Afternoon

19.03.2025 from 14:00 to 16:00

University of Vienna, Faculty of Mathematics, Oskar-Morgenstern-Platz 1

HS 2 (ground floor) and online on Zoom

From 14:00 to 14:45:

Hugo Lavenant (Bocconi University, Italy)

Lifting functionals defined on maps to measure-valued maps

Abstract: [SFB65.univie.ac.at/s/pm](https://sfb65.univie.ac.at/s/pm)

From 15:00 to 15:30:

Tobias Unterberger (TU Wien)

Effective theories for incompressible magnetoelastic shallow shells

Abstract: [SFB65.univie.ac.at/s/pn](https://sfb65.univie.ac.at/s/pn)

From 15:30 to 16:00:

David Wörgötter (TU Wien)

Helmholtz decompositions in broken Sobolev spaces

Abstract: [SFB65.univie.ac.at/s/po](https://sfb65.univie.ac.at/s/po)

The seminars take place in hybrid form (in person and also on Zoom). The Zoom link is sent per email through the SFB Newsletter (normally sent either on Friday or during the weekend). You can subscribe to this newsletter at [SFB65.univie.ac.at/#!/public/news/newsletter/subscribe/](https://sfb65.univie.ac.at/#!/public/news/newsletter/subscribe/)

Alternatively, if you are interested only in a given seminar, you could request a Zoom link by writing an email to matteo.tommasini@univie.ac.at (please write your request from an institutional email address, so that we can minimize the risk of Zoombombing).
